

HF Proximity Reader Module with integrated 8-times Multiplexer ID ISC.M02.M8

FEATURES

- Integrated Antenna Multiplexer
- Connection of up to 8 external antennas
- Multi-tag Reader for ISO15693
- Anti-collision function
- RSSI Data Readout

SHORT DESCRIPTION

ID ISC.M02.M8-B is designed as a reader module for contactless data exchange with passive ISO 15693 transponders. It is suitable for all applications where short read ranges with only a small reader size are required, such as for integration into medical devices.

The module has an integrated antenna multiplexer for the connection of up to 8 external antennas.

The reader module also reads RSSI data for localization of identified transponders.
